

# DRIVE-THRU HANDLE & WALL MOUNT

## CREATE SAFEST DRIVE-THRU EXPERIENCE

The Drive-Thru Handle by ENS provides the best Drive-Thru experience. Today's customer sees drive-thru as a safe and reliable solution for purchase of pharmacy and food items. Maintain a safe distance between the Drive-Thru team member and the cardholder, prevent staff from leaning out the window and eliminate touching of customer's credit card. The ENS Drive-Thru handle is made from the most durable, yet lightweight components, providing the best user experience.

Drive-Thru environments are high volume and harsh. This solution is rugged and durable to meet these requirements, yet lightweight enough to make it a easy to use for associates. Terminal/PINPad cables are safely routed within the unit, protecting them against twisting/breakage and protecting the payment device against theft. Further secure the terminal/PIN Pad against theft of substitution (PCI-DSS) when used with a tether.

- ✓ Best in class solution, durable and rugged yet lightweight
- ✓ Device specific backplates make solution compatible with most payment devices
- ✓ Weight-to-use ratio minimizes risks such as RSI for users/operators
- ✓ Wall Mount can be installed inside as well as outside, facilitating no-touch contactless payments
- ✓ Channel in the Wall Mount allows a tether to be added and secured to the payment device
- ✓ Advanced cable management, including cable clamps, for strain relief

## SUPPORTS ALL MAJOR PAYMENT DEVICES

**ENS. Better by Design.**
