

10.2 " Screen

UV-10

No touch automated disinfecting 24/7 on high touch surfaces with UVC light. Every indication is that UV-C light will be effective when used to combat current Coronavirus outbreak (COVID-19).

UV-CLEAN is your ultimate guard against the spread of infectious pathogens, eliminating 99.9%* of pathogens on high touch surfaces, including mobile devices. Our automated chemical-free disinfecting technology is your second line of defense against the spread of infectious microorganisms.

FEATURES:

No-touch, automated cleaning 24/7

Seamless integration and function makes improving disinfection easy

Motion sensing for safe deployment of UV-C light and it knows when it has been touched

Support current cleaning protocols without staff interaction

UV-Clean technology integrated into products produces a UV-C non-visible light that inactivates bacteria and viruses at the cellular level, preventing them from multiplying and causing any infection

UV-C disinfection technology has been in use for 50+ years

Now available & affordable for small high touch surfaces including touchscreens, tablets and pin pads

How Does It Work?

- Germicidal UV-C light is dispensed at low levels
- Microorganisms absorb the UV-C wavelength
- DNA of infection-causing pathogens are broken
- Pathogens are disabled, stopping them from reproducing and spreading
