No touch automated disinfecting 24/7 on high touch surfaces with UVC light. Every indication is that UV-C light will be effective when used to combat current Coronavirus outbreak (COVID-19).

UV-CLEAN by Proximity is your ultimate guard against the spread of infectious pathogens, eliminating 99.9%* of pathogens on high touch surfaces, including mobile devices. Our automated chemical-free disinfecting technology is your second line of defense against the spread of infectious microorganisms.

The UV-CLEAN Stand-Alone (UVC-SA) unit is designed to provide a quick and easy way to disinfect devices like small portable tablets and cell phones. Requiring minimal assembly, the unit is comprised of a stainless-steel tray, head unit and stand. With high touch items such as these, regular cleaning with low doses of UV-C light will help to eliminate the transfer of harmful pathogens while being safe for you. Simply place your mobile devices in the stainless-steel tray and walk away for the cleaning cycle to begin. Although hand washing policies should be your first layer of defense, UVC-SA will provide an additional level of disinfection to smaller mobile devices.

HOW DOES IT WORK?

- Germicidal UV-C light is dispensed at low levels
- Microorganisms absorb the UV-C wavelength
- DNA of infection-causing pathogens are broken
- Pathogens are disabled, stopping them from reproducing and spreading

HOW DO I KNOW IT IS CLEANING CONSISTENTLY?

Simply download the cycle reports from each individual device to confirm cleaning. Every unit includes a USB cable that allows you to connect the UVC-SA device to a PC. Easily access the built-in audit trail that resides locally on each device, eliminating any network security issues.

0° Rotation Coverage Area

15° Max Rotation Coverage Area

PROACTIVE, NEXT-GENERATION HIGH TOUCH SURFACE DISINFECTANT

With UV-CLEAN, you can set up a strong line of defense against the spread of infectious microorganisms on high-touch surfaces or objects. Gain the upper hand in the battle against germs.

PRODUCT DETAILS

- Automated and customizable cleaning cycle
- Motion activated for safe deployment of UV-C light
- 24" active cleaning area range
- Internal memory and built-in audit trail

- Flexible workspace configurations
- Sleek and stylish design 6" length x 1" diameter
- Affordable, scalable investment
- Independent low energy LED task light
- Two-year warranty

MATERIAL OVERVIEW

- 100% recyclable UV stable plastic
- UV-C bulb
- 12" micro USB to USB wire included
- 5.5 mm power port connection to USB or supplied power adapter
- North America: UVC-SA-NA
- International: UVC-SA-U

KEY FEATURES

- Ideal for smaller mobile devices like tablets and cell phones
- Convenient area to place devices for quick, yet effective ultraviolet disinfection
- Cable management within stand to conceal power cable
- Optimizes day-to-day workflow with an automatic means of self-disinfection
- Low cost of ownership to implement device that won't impact efficiency
